

## Creation – part 5

We saw that 24-hour days, everything is created in its kind, there was no death—eliminates evolution out of hand

--It does matter because if death came before man's sin then Jesus died for nothing and His death accomplishes nothing other than leaving us with a sad story.

--Evolution goes right after the necessity of a Savior which is the entire theme of Scripture—**evolution is not a benign doctrine!**

--Evolution would have you believe that mindless forces produced all the complexity and order that we see today, but that has never happened!

--Mindless forces have never produced complexity and order.

--Explosion don't clean things up and tornados don't assemble 747's from junk yards or arrange novels from Scrabble factories.

There is a reason for that—a scientific reason; and that reason is a thing called **entropy**—we know it from the Bible as “**the curse**”

--Science has codified and defined it but it actually is something everybody has known almost intuitively since from the beginning.

--**Genesis 3:1-19**

### 1. The curse soundly defeats evolution.

There are scientific laws that we know and can observe—they are universal and without exception (unless supernatural forces intervene).

#### Laws of Thermodynamics:

**Law #1 – energy is conserved** – there is no more energy, or, maybe in a more concrete way of thinking, there are no more atoms (balls of energy) being added or subtracted from the system.

--The Bible is in total agreement with this law: God rested and never created another thing after the 6<sup>th</sup> day.

--All atoms/energies were created in those days and nothing is being added to them.

--All creation after that has been a rearranging and, sometimes, splitting of those original atoms

--The universe is only rearranging atoms and, in some cases, subatomic particles.

**Law #2 – Law of entropy** – Entropy=randomness and disintegration. Entropy increases as time passes—things go from a state of order to a state of disorder. warm things (higher energy) become colder (transfer of energy) not vice versa.

We cannot create as God has created, from nothing to something, but we can create from one set of organized atoms to another set.

As a macro example: we can **create a car**, but we **cannot create the atoms of the car**. The atoms have always been here, we just reorganize them into compounds like steel, plastic, rubber, glass, or leave them in their elementals states copper, iron, zinc, silver. Those elements have to be put into that organization by exertion of energy and intelligence. How crazy is the notion that a car happened into existence by chance?

Nevertheless, those atoms that we organized into a car will not stay organized. They are, from the moment we create a car, heading back to the state of equilibrium where we found them. All those elements (iron, aluminum, copper, potassium, carbon, oxygen, hydrogen, nitrogen, sodium, lead, etc.) are headed back to the ground where they came from.

--Take that car and set it in a parking lot near the salt water for 100 years and what will you get?

**The curse/entropy means everything is headed back to what it was before God organized it into creation.**

--**Colossians 1:17** – God can remove His power and everything will fly apart, back to their elemental states.

--**Revelation 19:20-21** God speaks things into existence and speaks them out of existence—**Hebrews 1:3.**

**Because of God's curse, Entropy is happening to everything living and non-living with no exceptions (thus, it is called a law).**

--Balloons don't inflate on their own do they? They deflate.

--A hot cup of coffee doesn't stay hot over time.

--Everything is going from a high state of order (low state of randomness and disintegration), thus low entropy, to a low state of order or high entropy (high state of randomness and disintegration).

--The sun, the earth, the solar system, the universe and every last thing within it was better in past than it is today; more organized; more together; and it all headed to state of equilibrium.

**Your car is headed to a state of equilibrium**—someone organized the elements found on earth, but those elements and molecules are headed back to where they came from—back to the earth from which they came

**You house is headed back to a state of equilibrium**

**Your body is headed to a state of equilibrium**—Someone organized the elements found in dust and turned it into the extremely complicated organism called you, but because of the law of entropy, you are headed downhill back to dust – back to the state of equilibrium that your body came from.

**This law defeats any chance that Evolution ever had** because it states clearly that the natural order of all things is downhill not uphill.

--Things do not evolve into higher states of order and complexity they devolve.

--Things don't get better over time; things don't become more organized over time, they come apart.

**2. This law is in complete agreement with the Scriptures: Genesis 3**

--**VV. 1-3** – Death is the perfect illustration of the law of entropy. Everything is dying/degenerating.

--Death came as result of the Creator God removing His blessing from the universe and replacing it with the curse.

--**VV. 17-19 – Romans 8:18-21** – It's all been cursed because of sin.

--The curse is a law of nature and it is observable and repeatable and has no exceptions.

--This laws of nature eliminates evolution as a possibility of how we came into existence.

--**Whether we believe in God or not, the curse is a scientific fact.**

Evolution was invented, not because the facts demanded it but in spite of the facts, to eliminate the Creator who is also the Judge, so that people could imagine themselves free to do whatever they want without guilt or consequence.

In Mein Kampf, Hitler expresses His sadistic mind that the evolutionary theory was the justification for the destruction of the masses who threatened the evolution of the super race. "He who would live must fight. He who does not wish to fight in this world where permanent struggle is the law of life has not the right to exist."

The head of the Nazi labor front said that Hitler's massacres expressed, "the highest and best in manhood."

Julian Huxley, biologist and evolutionist, wrote in 1964, “[Evolution is the most powerful, most comprehensive idea that has ever arisen on earth.](#)”

### Really?

--It is the single, greatest, satanic lie the world has ever known, because it eliminates the need for a Creator and our answering to Him.

Darwin, “[I am determined to escape from design and a personal God at all costs.](#)”

Logic says, “[Oh, there’s a universe, Hmmm, somebody made that.](#)”

--What else would it say?

--“[there’s a building, I wonder who made it?](#)”; “[there’s a piano, I wonder who made it?](#)”;

--There is a universe, vastly more complex than a piano—Someone who is very, very powerful and very, very intelligent made it.

--It is logical suicide to say chance created all of this.

--Logic abandoned leaves us with myth, but the enemies of myth are empirical data and God-given reason.

--So, in order to be an evolutionist, and believe that chance created everything, you will have to reject logic and empirical data, and embrace irrationality.

--**If you love your sin enough, you’ll do it!**

### **As I’ve said before, the main enemy of evolution and the ally of Scripture is actual science.**

--Real numbers and statistics and real measurements of actual, verifiable things.

If everything has remained the same for millions of years, that includes no biblical flood that reduced the world’s population to 8 people just a little over 4,000 years ago, then why are we only now having a population explosion?

--In the mid 1600’s the population globally was estimated to be around 400 million.

--At the beginning of the 1800’s, the global population was about 800 million.

--In 1990, the world’s population was about 5 billion and today it is 7.8 billion.

--So, the population has doubled, on average, every 50 years since the 1600’s.

--Not a problem if you believe in a young earth and humans being on this planet 6 or 7 thousand years, but it is a huge problem if you’re an evolutionist and hold to humans being around for a couple of million years or even just 500,000 years.

If we have been here 500k years then we have to believe that the population only doubled only ever 16,500 years! THE NUMBERS Don’t WORK!

--Today, the world’s global family has an average of 3.6 children with population increase of 2% per year.

--Factoring in famines, plagues and catastrophes, a very conservative estimate of surviving children per family was 2.5 over the history of mankind.

--But we know through all of our histories and all that is available to us, that the families of the past were far larger than they are today on average.

--Nevertheless, with a very conservative estimate of 2.5 children per family that would give us a growth rate of .5%/year.

--Also, if we have been here for half a million years, and a generation today is 25 years—but back then a generation was 20 years, let’s say, then that would give us 25,000 generations!

--25K generations at .5% growth rate would give us this number for population today:

$1 \times 10^{2,100}$ —that is a preposterous number!

--That is enough people, if we laid them down like cord wood, to fill all the oceans and cover all the land surfaces and stack people out past the earth's atmosphere and still have plenty more people to spare!

Again, math, logic, and real science say that evolution is preposterous.
